

SCAM ALERT

Scammers Target Everyone.

DO NOT give scammers money or personal information -
Ignore them!

Tips to Recognize Scammers:

- **Too Good to Be True:** Be cautious of promises of easy money or unrealistic rewards.
- **Avoid Urgency Pressure:** Take your time to verify before committing to pressure tactics.
- **Stay Alert to Unsolicited Requests:** Watch out for unexpected requests for personal information or payment.
- **Verify URLs:** Check links to ensure they match the expected destination and avoid phishing scams.

How to Avoid a Scam:

- **Research and Verify:** Before sharing personal information or making payments, research the company or individual online for reviews, ratings, and reported scams.
- **Protect Personal Information:** Never share sensitive information like passwords, SSNs, or financial details with unknown parties, as legitimate organizations won't request such data through unsolicited calls or emails.
- **Protect Your Money:** Beware of scammers who demand payment via untraceable methods like gift cards, prepaid debit cards, cryptocurrency, wire transfers, money transfers, or cash by mail.
- **Stay Informed:** Keep up to date with the latest scam tactics and share information within your community.
